440 Logan S.E. The significance of this English-style house built in 1914 is based as much on its enormity as on the family that built it. Harry C. Leonard, along with his father, Charles H. Leonard, invented the liner for the first electric refrigerator. He set about mass-producing the Leonard Cleanable Refrigerator at the factory that would eventually become the Kelvinator plant on Clyde Park south of Grandville Avenue, S.W. Dorothy Leonard (Mrs. Siegel) Judd (born September 14, 1898) was the granddaughter of Charles H. Leonard, and recalled that he had purchased the first automobile in Grand Rapids in 1903.

645 Logan S.E. Martin Luther King Jr. Leadership Academy, popularly known as "MLK Elementary School." Designed by the Tower Pinkster Titus architectural firm and opened in September, 2006, this state-of-the-art building replaced the 80-year-old Henry School, which stood on the northwest corner of the property near James Avenue.
