428	Pleasant S.E. Built in 1910.		

**549 Pleasant S.E.** This classic four-square home was built about 1912-13. No lumber barons or furniture magnates lived here. The sturdy, simple

structure was built for and maintained by working-class people, eventually going through some tough treatment in the 1970's and 1980's. The workmanship and design of the home has been renewed by Rick Santamaria, who purchased it in 2000. (Photo: 2002 Heritage Hill Weekend Tour of Homes brochure, p. 14.)
